Office Action Summary	Application No. 10/777,372	Applicant(s) FOSTER ET AL.	
	Examiner Vincent Rudolph	Art Unit 2625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 23-30 and 34, drawn to identifying and receiving a substitute printer driver based on a compatibility rating, classified in class 358, subclass 1.13.
- II. Claims 21-22 and 31-33, drawn to directly modifying the information related to the substitute printer driver, classified in class 358, subclass 1.16.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability and (2) that the subcombination has utility by itself or in other combinations. (MPEP 806.05(c)). In the instant case, the combination (the system) as claimed does not require the particulars of the subcombination (II) as claimed for patentability because: the subcombination (II) has a separate utility such as having the user directly amend the database whenever a printer driver is not available by entering the information related to it, such as the known printer type identification, the associated substitute printer driver identification, and the associated compatibility rating (See Claim 21), or having the user amend the database whenever the one of the records is inaccurate (See Claim 31).

Inventions I and II are related as subcombinations disclosed as usable together within a single combination. The subcombinations are distinct from each other if they

Art Unit: 2625

are shown to be separately usable. In the instant case, invention I has a separate utility that allows the user to select the print driver based on the printer type identification and a compatibility rating for it from a database without directly entering and changing any information related to the printer driver. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vincent Rudolph whose telephone number is (571) 272-8243. The examiner can normally be reached on Monday through Friday 8 A.M. - 4:30 P.M.
